Hospital Consumables**

# Intensive Phototherapy

## Application

The device is used to treat jaundice in infant with high bilirubin

## Device features

12 and 16 LED lamps model

Includes temperature sensor and skin sensor

LCD Screen capable of displaying the duration  
of light therapy and bulb operation time

Ability to adjust the phototherapy

Noiseless fan

Device Alarms	
Skin sensor interruption	✓
End of treatment	✓
Device Specifications	
Dimensions	80 * 70*128 (Cm)
Infant location	61 * 50 (Cm)
Weight	40 (Kg)

# Hospital Phototherapy

## Application

A device to reduce infant bilirubin levels in health centers

## Device features

Displaying the duration of light therapy and bulb operation Time

Includes air temperature sensor

Adjustable light therapy time

Audio and visual alarms

Noiseless fan

Adjustable height of head (130 to 170 Cm)

Usable on incubators and infant bed

Device Alarms	
End of treatment	✓
Device Specifications	
Dimensions	68* 64*130 - 170 (Cm)
Weight	16 (Kg)

# Neonatal Resuscitator Bed Unit

## Application

Device for neonatal surgery, blood transfusions and neonatal care at the crib and neonatal medical examinations

## Device features

### Device table

Transparent walls to monitor the baby  
The walls can be opened  
Changeability of the angle

### Radiant warmer System

Adjustable temperature  
Ability to control the infant's body temperature by skin sensor connected  
This apparatus has lighting system  
Adjustable timer  
Has two modes, Manual and Auto  
Possibility of rotating the heater compartment

### Phototherapy

Adjustable light therapy time

### Suction control system

### Oxygen control system

### Radiology tray

### Serum base

### Monitor tray

Device Alarms	
Skin sensor interruption	✓
Over temperature	✓
Temperature deviation	✓
End of treatment	✓
Temperature warning above 40 C	✓
Device Specifications	
Element	650W
Dimensions	110 * 80 * 190 (Cm)
Enclosure dimensions	70 * 60 * 13 (Cm)
Weight	87 (Kg)
